zumilah@upm.edu.my

Norehan Binti Saidi
Student Master Science (Gender and Development)
Department of Resource Management and Consumer Studies
Faculty of Human Ecology UPM, Malaysia

GAF7, Bangkok (2018)
Problem Statements

1) Fisheries and aquaculture economic sector (FAES) is important for food security (Musa et al., 2011), GDP (Malaysia Department of Statistic, 2016) and poverty eradication (Patricia and Julia, 2008)

2) FAES is masculine (Biswas, 2017), there are marginalized group especially women

3) poverty eradication (SDG-1), food security (SDG-2), gender equality in financial wellbeing (SDG-5), and reduce inequality of financial wellbeing between VuT and able-bodies (SDG-10).
Objective

1) To profile the Vulnerable Community Members (VCM)
2) To identify the distribution of respondents by Vulnerability Type (VuT)
3) To measure the relationship between sex and vulnerability levels
# Vulnerability Type (VuT)

<table>
<thead>
<tr>
<th>Dimension of Wellness</th>

VCM Profile (Sex)

- **Serious Disease**: Female 37.22%, Male 54.44%
- **Stay Alone**: Female 1.79%, Male 3.33%
- **Care Takers**: Female 7.62%, Male 6.67%
- **The Elderly**: Female 8.52%, Male 6.67%
- **Single Mothers/Fathers**: Female 8.89%, Male 34.53%
- **Handicapped**: Female 10.31%, Male 20.00%

Note: Only Single Mothers/Fathers VuT has significant relationship with Sex.
VCM Profile (Locations)

- Serious Disease: 43.95% (Langkawi Island), 40.38% (Kuala Kedah)
- Stay Alone: 3.18% (Langkawi Island), 1.28% (Kuala Kedah)
- Care Takers: 9.55% (Langkawi Island), 5.13% (Kuala Kedah)
- The Elderly: 7.64% (Langkawi Island), 8.33% (Kuala Kedah)
- Single Mothers: 19.75% (Langkawi Island)
- Handicapped: 15.92% (Langkawi Island), 10.26% (Kuala Kedah)

Note: Care takers and handicapped VuTs have significant relationship with Locations

GAF7, Bangkok (2018)
VCM Profile (Poverty Level)

Note: Serious disease VuT has significant relationship with Poverty Level

GAF7, Bangkok (2018)
Other Backgrounds and Sex

- **House Ownership**
  - NO: 32.88% Female, 37.76% Male
  - YES: 62.24% Female, 67.12% Male

- **Location**
  - Langkawi Island: 46.58% Female, 58.04% Male
  - Kuala Kedah: 41.96% Female, 53.42% Male

- **Marital Status**
  - Married: 47.14% Female, 75.34% Male
  - Single: 24.66% Female, 52.86% Male

- **Academic Backgrounds**
  - Others: 58.04% Female, 58.90% Male
  - Primary: 13.99% Female, 23.29% Male
  - Secondary: 17.81% Female, 27.97% Male

GAF7, Bangkok (2018)
RO2: Distribution of Respondents by VuT (n=215)

- Serious Disease: 61.11%
- Stay Alone: 3.24%
- Care Takers: 10.60%
- The Elderly: 11.60%
- Single Mothers/ Fathers: 39.35%
- Handicapped: 18.98%
RO3 - Relationship between Sex and Vulnerability Levels ($p < 0.05$)

<table>
<thead>
<tr>
<th>Level</th>
<th>Female</th>
<th>Male</th>
</tr>
</thead>
<tbody>
<tr>
<td>High Vulnerable</td>
<td>15.97%</td>
<td>6.67%</td>
</tr>
<tr>
<td>Vulnerable</td>
<td>84.03%</td>
<td>93.33%</td>
</tr>
</tbody>
</table>

## Conclusion

<table>
<thead>
<tr>
<th>Conclusion</th>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>RO1: Many poor VCM suffer serious disease</strong></td>
<td>Program and policies related to medical cost and healthy living</td>
</tr>
<tr>
<td><strong>RO1: Many poor and old single mother</strong></td>
<td>Promote program related to single mothers especially for income generating</td>
</tr>
<tr>
<td><strong>RO2: Many vulnerable due to disease</strong></td>
<td>Promote program related to health and stress</td>
</tr>
<tr>
<td><strong>RO3: Women are more vulnerable than men</strong></td>
<td>Policies on vulnerability should be gender sensitive</td>
</tr>
</tbody>
</table>
