

# Application Form for Awards Supporting Gender in Aquaculture and Fisheries Journal Articles

The 8th Global Conference on Gender in Aquaculture and Fisheries (GAF8) was to have been held in April 2021 but, due to the COVID-19 pandemic, it is postponed to a later date (to be advised). In preparation for GAF8 the Gender in Aquaculture and Fisheries Section of the Asian Fisheries Society (GAFS) is joining with the CGIAR Research Program on Fish Agri-Food Systems (FISH) to call for proposals for awards to support the preparation and publication of quality, open access, research articles. The awards will help support gender researchers to publish their journal articles.

We are seeking high quality gender research papers that will be completed in year 2021 and shared, upon publication, through journal open access via the CGIAR GENDER Platform repository and the GAFS document repository.

We offer four (4) awards to individual researchers or teams who are well advanced in preparing high quality manuscripts suitable for submission to reputable research journals.

## Selection criteria and process

Applications will be assessed by a panel from GAFS and CGIAR-FISH according to the following selection criteria.

1. The applicant/team will have a well advanced manuscript on gender in aquaculture or fisheries in a developing country that, with additional work, will be available for submission to a high quality peer-reviewed journal by 1 July 2021.
2. The topic of the study on which the manuscript is based will be relevant to the gender focus areas within the FISH flagships (see: <https://fish.cgiar.org/gender-research-in-fish>) (ie. sustainable aquaculture, resilient small-scale fisheries or aquatic food systems) and the Objectives of GAFS (see: <https://www.genderaquafish.org/gaf-section/by-laws/>). The following topics are of particular interest as emerging themes for GAF8, but the award opportunity is not limited to these topics:
  - a. Gender and seaweed aquaculture
  - b. Labour in fisheries and aquaculture
  - c. Gender in fisheries with special reference to COVID-19
  - d. Gender in SSF
3. The originality and clarity of the study concepts and design, the rigour of the study methodology and the quality of data collection, analysis and interpretation as indicated in the application.
4. The applicant/team will be in the early career stage of publishing in GAF, as judged by experience in this field, not just by chronological age.
5. The team/applicant may be from any country. The program will endeavour to support work from a range of geographies, especially work from authors and areas presently underrepresented in the GAF peer-reviewed literature.

Please answer all of the questions.

\* Required

1. Email address \*

---

Information  
on  
applicant(s)

Questions in this section cover basic information on the applicants or teams. Each team should complete only one application, and provide details for each team member.

2. 1.0 Please indicate whether this application is being made by you as an Individual applicant or as a team representative \*

*Check all that apply.*

Individual applicant

On behalf of team

3. 1.1 Full name and title of individual applicant or team leader or representative \*

---

4. 1.3 If you are applying on behalf of a team, please provide each team members' name, title, full address and email address. If you are an individual applicant, please proceed to the next Section.

---

---

---

---

---

5. 1.4 Please list up to 3 papers on gender and fisheries/aquaculture that you or your team have published. \*

---

---

---

---

---

Information  
on  
proposed  
journal  
article

This Section requests information on your proposed journal article, its themes, stage of development, description of work remaining before submission and, if known, potential journals to which it may be submitted.

6. 2.0 Title of your proposed paper \*

---

7. 2.1 Brief overview – 400 words max – of the work that is being covered in your proposed paper. In your overview, please indicate the location of the study, the field of research, the concepts and methodology, method of data collection and analysis used/planned, the likely outcomes and relevance of your work. Synthesis and review papers are also welcome. \*

---

---

---

---

---

8. 2.2 Please provide the stage of development of your manuscript, using the following scale and an additional explanation if required. \*

*Mark only one oval.*

- A - at least full draft completed
- B - partial draft completed
- C - fully developed outline, some drafting commenced, references have been collected and read, data analysis has been completed
- D - Still analysing the data collected and formulating results
- E - Data compilation in progress
- F - Other

9. 2.3 If you answered "F - Other" to question 2.2, please provide further information here on the stage of development of your paper. You may also use this question to provide any additional information on the stage of development of your article.

---

---

---

---

---

10. 2.4 Please describe what additional work remains for you or your team to complete the manuscript to submission stage – in under 400 words \*

---

---

---

---

---

11. 2.5 If you have considered one or more suitable journals as possible places for submission, please indicate which journal or journals you have considered. For each journal listed, please also provide the URL to the journal information page. You may wish also to indicate your reason for selecting a journal.

---

---

---

---

---

12. 2.6 Any other information you wish to provide
